

DECISION SUPPORT FOR DECEPTION DETECTION AND INTEGRITY ASSESSMENT

# FROM SCREENING TO INSIGHT

## CONTACT-FREE PHYSIOLOGICAL DECISION SUPPORT FOR HR

Most hiring and integrity decisions rely on interviews, documents, and intuition.

SensAI adds objective physiological signals from standard video in real time helping HR and security teams know where to probe, what to revisit, and when further review is warranted.

## WHEN TRUST MATTERS BEFORE DAY ONE

### WHAT MAKES SENSAL DIFFERENT

#### MULTI-SIGNAL PHYSIOLOGY

Analyzes HR, HRV, blood-flow dynamics, respiration and more.

#### BUILT FOR LIVE SCREENING

Supports pre-employment, integrity, and sensitive-role interviews.

#### REAL-TIME GUIDANCE

Highlights moments that merit follow-up while the session runs.

#### STANDARD VIDEO ONLY

No sensors. No wires. No wearables. No subject preparation.

### WHY IT MATTERS

Critical hires and high-trust roles depend on more than answers alone. SensAI adds a signal layer that supports more consistent and defensible screening.

### OPERATIONAL IMPACT

- ✓ Identify topics of concern in real time
- ✓ Improve screening consistency
- ✓ Reduce time to actionable insight
- ✓ Support defensible hiring decisions

### BUILT FOR HIGH-INTEGRITY HIRING

Pre-Employment  
Screening

Sensitive Role  
Screening

Employee Integrity  
Screening

Contractor & Vendor  
Screening

#### GLOBAL SCALE

**30B+ interviews every year**

<0.1% involve trained investigators

#### PROVEN IN THE FIELD

- ✓ Operationally validated in government and enterprise
- ✓ Used for interviews, screening, and integrity assessment
- ✓ Fast start: sessions can begin in under 40 seconds

#### OBJECTIVE SIGNALS

Physiological insight from  
standard video

#### REAL-TIME GUIDANCE

Highlights moments that  
merit follow-up

#### HUMAN-IN-CONTROL

Supports judgment,  
never replaces it
